

**Austin Peterson****Consultant:** EAAS – AI&D

Austin, TX

austinpeterston20@gmail.com

Summary of Experience and Qualifications

Austin is a TMT-aligned Consultant in Deloitte's AI & Data practice with 3.5 years of consulting experience. He specializes in data analytics, business operation strategy, test strategy/implementation and technical project management. Most recently, Austin was engaged on the test governance team of a record setting Oracle transformation with a fortune 50 company where he defined test strategy, data governance, scope management and change control across a massive scope. Typically Austin serves as a Driver – Integrator, driving key tasks forward and building relationships with other members of the project to improve cross functional collaboration.

Outside of client work, Austin is also involved with the Austin TX TMT community where he hosts office events and happy hours as well as the Austin Impact Day group where he regularly serves as a Site lead, leading Deloitte practitioners in our efforts to give back to the ATX community.

Deloitte Experience**Industry:** TMT **Sector:** Technology**Offering Portfolio:** EAAS**Offering:** AI&D**Test Governance/PMO;** 1 year, 8 months.Fortune 50 Technology Company (*NDA Protected*)**Role:** Test Governance (1 year, 4 months)

On a record setting, \$500m+ Oracle transformation project, Austin served as the primary bridge between the PMO, Client and Test Governance teams and gradually became an integral member of the testing governance team managing a complex testing scope across multiple levels of encapsulation and 15+ teams. He owned testing scope and change control across multiple releases for ~15k scenarios, ~60k test cases and ~300k variants, ensuring consistent alignment across client/internal leadership, automation teams, and ~30 client business/IT leads. Austin also helped define strategies for test execution, Jira structure, defect management, change management and key reporting across multiple test phases and served as a key contact for automation—generating thousands of variant files for automated execution via a GenAI-assisted VBA macro that he built saving hundreds of hours of manual work.

Role: PMO (4 Months)

During Austin's initial days on the project before transitioning to test governance, he supported the PMO team to define/refine program SOWs, drive program-level staffing across the program, track critical open items and questions, and plan/host program town halls across our US and USI communities.

Technical Environment: Oracle Cloud**Industry:** Government **Sector:** State, Local, and Higher Ed**Offering Portfolio:** Core Business Operations

Offering: Cloud Engineering

Boundary Systems Security Lead; 1 year, 4 months.

University of California - Los Angeles

Role: Boundary Systems Security Lead

Boundary Systems retrofit member responsible for coordinating the identity access management and transaction approval workflow portion of UCLA's Oracle Financials Cloud migration for 70+ systems across 20+ departments. Defined general and security retrofit timelines, coordinated proof of concept development and backend Oracle security configuration (shell role configuration, approval groups, etc.), and helped design future state security model. Regularly coordinated with client teams to collect technical requirements, analyze current state business processes and technical operations, distribute information on program developments and future state architecture, answer questions and provide clarity on retrofit tasks, and ensure that client retrofits go smoothly and successfully. Supported technical senior management with various miscellaneous tasks and workstreams throughout the project, including proposals for expanding scope, onboarding new members, resolving project risks, and drafting RACI matrices for assigning key thread and subtask ownership. Managed ServiceNow resources through development of access request, approval and fulfillment forms integrated with core IAM platform.

Technical Environment: Oracle Financials Cloud

Industry: Financial Services **Sector:** Banking and Capital Markets

Offering Portfolio: Core Business Operations **Offering:** Enterprise Operations as a Service

Release Engineer; 2 months.

Fortune 50 Banking Company

Role: Release Engineer

Analyst for the release operations team that coordinated and executed deployments of core business infrastructure. Coordinated with clients and internal team leadership to analyze release processes and provide potential avenues for operational improvements. Provided 24/7 support for client deployments and ticket handling.

Technical Environment: Octopus Deploy

Industry: Consumer **Sector:** Technology

Offering Portfolio: Core Business Operations **Offering:** AI & Data Operations

Developer; 1 months.

Day Care Center

Role: Developer

(PRD Work - Project Proposal) Developed a functional facial recognition algorithm for proposal proof-of-concept using Azure's Cognitive Service AI. Allows for real-time digital check in for customers and reliable client recognition without retaining user information post-registration. Successfully demonstrated prototype to proposal team as well as Deloitte CND guild members.

Technical Environment: Python, Azure

System Experience

Software / Products: Claude AI – Training and Personal experience, Docker - training only, Azure - project experience, Oracle Financials Cloud - project experience, GCP – training only, AWS - training only, Git/Github - project experience, Jira - project experience, ServiceNow – project experience

Development Tools / Languages: C/C++ - project experience, Python - project experience, Ruby/Rails - project experience, HTML/CSS - project experience, Javascript - project experience, Bash - project experience, SQL - training only, Node.js - training only

Hardware / Operating Systems: Windows - project experience, Linux - project experience

General Tools: Excel – proficient project experience, Powerpoint - project experience, Microsoft Word - project experience, Microsoft Projects - project experience, Microsoft Teams - project experience

Education

Bachelors of Science, Computer Science

Texas A&M University

Minors in Business and Engineering Project Management

Texas A&M University

Professional Affiliations / Certifications

- Azure Certified: Azure Developer Associate
- Azure Certified: Azure Fundamentals
- AWS Certified: Cloud Practitioner
- GCP Certified: Associate Cloud Engineer
- Claude Certified: Claude 101

Foreign Language Skills

- Spanish - Basic Conversation
